Sage accepts coverage from the following health insurances:

Prices listed are for Q2 2022.
 1. Sage offers the lowest drug and administration prices in the industry at only 4% above the government-controlled price available to those on Medicare. Subject to quarterly change. Price can vary depending upon ordered dose & patient weight, please contact Sage for exact price.
 2. Many drug companies offer financial assistance to patients with commercial insurance, however many infusion centers don't educate patients about this resource. Sage works on behalf of our patients to secure this assistance for out-of-pocket expenses before they reach the deductible on their insurance plan. We've listed the maximum financial assistance for each drug available to each patient per year. Per Federal Law, assistance is not available to government-sponsored insurance like Medicare.
 3. Sage Infusion doesn't charge for office visits, consultation, extra labs, or pre-meds (i.e. Tylenol).
 4. Medicare estimate assuming patient has supplemental coverage.
 5. Medicare Advantage members typically have 20% co-insurance responsibility for infused drugs until out of pocket max is reached (typically \$6,000 for the year). Once out-of-pocket max is reached, patient responsibility= \$0.
